

THE CONTEXT AND IMPLEMENTATION OF COMPLEX INTERVENTIONS (CICI) FRAMEWORK

A useful tool for Health Technology Assessments (HTA) and Systematic Reviews

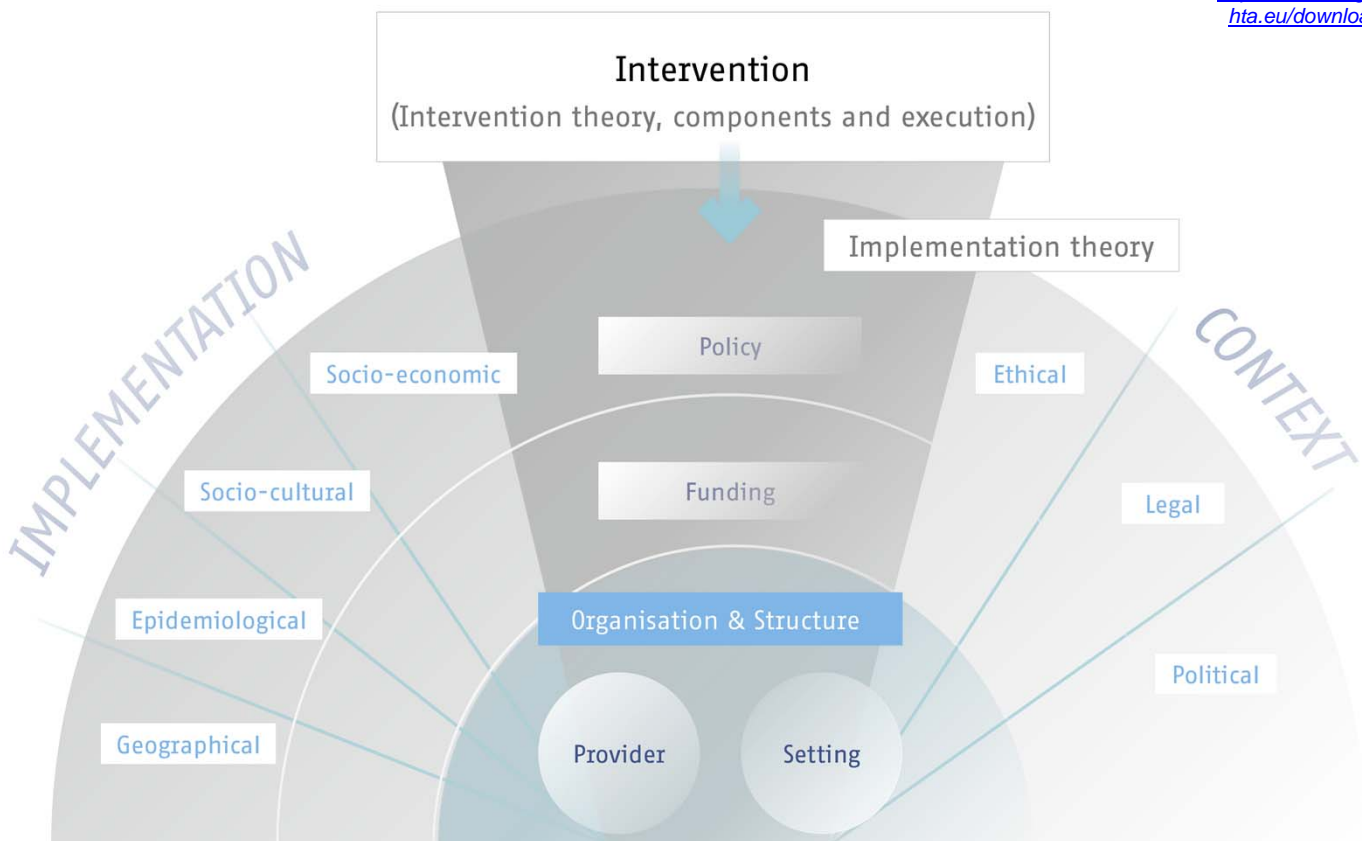

Purpose of CICI framework guidance

- Summarise current practice in how context and implementation are conceptualised and used
- Provide definitions of context and implementation and characterises distinct domains of both concepts
- Offer guidance on how to assess context and implementation in quantitative and qualitative systematic reviews as well as HTA
- Provide a checklist and data extraction forms

The guidance for the Assessment of Context and Implementation in Health Technology Assessments (HTA) and Systematic Reviews of Complex Interventions can be downloaded from: <http://www.integrate-hta.eu/downloads/>

The Context and Implementation of Complex Interventions (CICI) Framework.

Added value of CICI framework

- Facilitates a comprehensive and structured assessment of context and implementation
- Provides a graphical representation of both concepts
- Is ideally used alongside logic models and the INTEGRATE-HTA model
